

DEAD SOULS

by Miles Mathis

First published May 10, 2024

Is this guy still around? Why wasn't he tarred and feathered and given a one-way ticket to Svalbard three years ago, along with Tony Fauci, Bill Gates, Albert Bourla, Rochelle Walensky, Tedros Ghebreyesus and thousands of others? That's FDA Commissioner Robert Califf, one of the biggest ghouls on the planet and a mass murderer, sharing responsibility for millions of deaths. Rather than be fired and tried for crimes against humanity, Califf has been sheltered in his position in the Biden administration by the hidden monsters, and [he is now pushing the next big hoax and genocide: bird flu.](#) He told senators this week the virus is mutating and may soon jump to humans. If it doesn't, he will instruct his boys in the lab to keep working until it does. No doubt Pfizer has some drug in the pipeline to "cure" it, like they cured those with Covid.

I had some sympathy for those who took the last fake vaccine, since most of them didn't know any better. They *should* have known better, since anyone who trusted the government in 2019 was already not just hopelessly naive, but an errant fool. The evidence had been coming in for many decades and was already piled to the Moon. But here we are four years on, and anyone who buys into the next big lie deserves what they get. To have not figured this out by now you have to be living under some rock of incurable stupidity. And not just stupidity, but fatal levels of pig-headedness. There has now been a loud chorus of warnings from all around: experts, whistle-blowers, doctors and nurses, coroners, *and their own family members*. I warned everyone I could back in 2020 to avoid the "vaccines" at their own peril, begging them not to take it, but almost no one listened. They chose to trust people like Califf instead, because he is a "doctor". A doctor of death. And that is why I am here today. I am here to encourage you to look closely at him. You should have known just by looking at him. All these people had "LIAR" written boldly across their faces, but almost everyone missed it. How can that be?

This is the question no one else is addressing, so I guess it is up to me, as usual. As a portrait painter perhaps I am especially qualified to talk about it. Though, to be honest, I don't think that has much to do with it. I think there are good portrait painters who can see faces but not *read* faces. But maybe the greatest portrait painters have all been readers of faces as well, since the final and most important step in painting a face is imbuing it with emotion. If you can't read emotion and spirit, you can't hope to paint it.

I have been aware for a long time that many, perhaps most, people can't read faces. I could tell that because I could see that they couldn't tell the difference between a really good portrait and just an average likeness. They couldn't tell the difference between a dead face and a living face. They couldn't judge paintings because they couldn't judge people, and they couldn't do either one because they couldn't read emotion in a face. I found this all the more shocking with women, because we are taught they are intuitive and social beings. I had accepted that as a young man, because I could see they were more social. Almost anyone is more social than I am. But that just meant they were more chatty. As I came to discover, it didn't mean they were more likely to be able to read faces. Most often it just meant they needed group validation. I have never been much in need of group validation. To be honest, I could see they needed my validation, but I didn't much care for theirs. In fact, I soon came to see group validation as a sign I was doing something wrong. By the time I entered the art market I had boiled it down to this: *the customer is always wrong*. If the dimwits of the realist market were wanting or recommending something, it just signaled to me to go the opposite direction. When I entered it, all the art markets were so perverse and corrupt a true artist could use the field as an inverse barometer.

Anyway, my point is that the current tragedy isn't just a tragedy of evil entities, bad information, and a gullible public, it is a tragedy of failed intuition and instincts. The first three could have been transcended with basic intuition, but it appears that has been bred out of us as well. We no longer have any basic sense of good and evil.

To remedy this, I recommend you study photos and videos of these people closely, memorizing what exactly evil looks and sounds like. It will be to your benefit in the future.

That's Albert Bourla from a few years ago. He looks worse now but this one is without the glasses, so you can see his eyes more easily. Look at those dead eyes and lying mouth. He can barely manage a smile with his mouth, since it is completely false, and his eyes aren't smiling at all.

Stone dead. A zombie soul in a dying head.

Bourla started with Pfizer as a veterinarian, which I take to mean he was torturing defenseless animals in their testing labs. So he was already consigned to the 9th circle of hell for that, before he ever got into genocide on humans. He is a Greek Jew, if you were wondering where his accent comes from. He claims his mother was minutes away from being killed by a firing squad in the Holocaust, but was spared by a ransom paid by her Gentile brother-in-law. Believe that if you want, but I don't. It is just the usual attempt to con you into sympathizing with him.

It should now be clear there was always something seriously wrong with Bill Gates. I personally can't believe he is still at-large, considering everything. [That photo is CGI enhanced]

This is especially clear in interviews, where he is obviously insane. As with Biden, I can't believe he is allowed on camera. His eyes and mouth are both very scary. In the past decade he has graduated from disgustingly odd to transparently disturbed and evil, and someday Hollywood screenwriters will use these interviews to pattern their villains. I predict a complete personality breakdown in the next three years, with him either being institutionalized or faking his death to avoid the embarrassment of that.

Is Gates Jewish? [See here.](#)

Califf not only has those dead eyes, he has no eyebrows. He looks like he has been weeping over his own fall into hell for the past forty years, or drinking himself to sleep every night, or both. And, as with Gates and the others, [he is ten times worse in interviews](#), where his voice gives him away as well. Califf was head of medical strategy at Alphabet when he was brought back as head of FDA by Biden in 2021, so we have that strike as well.

Is Califf Jewish? Yep. They make some effort to scrub him at Wiki and other places, but his father was John W. Califf and his mother was Sarah McKinnon. All this info is up for free at Findagrave. His maternal grandmother was a Sellers, and they are also Haas, Wieters, Phifer (Pfeiffer), Carpenter, Lindsay, Mahony, Bamberg, Swift, Langdon, Tindal, Redford, and Holman. Those names link us to a lot of famous people, including the usual Hollywood finks.

When not working for the FDA,

He was a paid consultant for Merck Sharp & Dohme, Johnson & Johnson, GlaxoSmithKline, AstraZeneca, and Eli Lilly. He was a director of Portola Pharmaceuticals, Inc. from July 2012 to January 26, 2015, [14] an advisor for Proventys, Inc., chairman of the medical advisory board of Regado Biosciences, Inc. and has been a member of that board since June 2, 2009, and a member of the clinical advisory board of Corgentech Inc.

Telling us all we need to know. **Forbes wrote that his close ties to the drug industry were why he was not nominated for the FDA Commissioner position in 2009.** You have to laugh. Or cry. So not in 2009, but in 2015 and again in 2021. I guess we are supposed to believe FDA and Congress went from 95% corrupt in 2009 to 100% corrupt in 2015.

Strangely, I couldn't find this Robert McKinnon Califf at InstantCheckmate. The computer has never heard of a Robert Califf of that age from South Carolina and DC. So like Ketanji Brown Jackson and many others I have researched, Califf is a ghost.

Why would anyone listen to this guy? Why are your senators politely listening to this pawn of Big Pharma and mass murderer give testimony in Congress? If any one of those 100 people had a shred of dignity or decency, they would attack him with both barrels blazing for the criminal and liar he is. They would instruct the sergeant of arms to arrest him for conflicts of interest, perjury, and genocide, along with the little Jew Fauci.

What do we see there? Dead eyes. The man is a zombie inside. He sold out to Mammon decades ago. You will say I am just judging old people for being old. Their eyes get smaller and more wrinkled.

They lose some sparkle from having to live in this world for 80 years. Yes, that is true, but that is not what I am talking about. I am talking about the spirit looking at you through those beady little pupils. The eyes are a two-way window, and you can also see in through them. I can see Fauci's nasty little black soul crouched in there, and you could too if you would just look. But you have been taught not to judge people by the way they look or feel. You have been taught not to see anything. Look away. Move on.

What about Rochelle Walensky?

Is she Jewish? Of course, maiden Bersoff, mother a [Bernstein](#). And she has been replaced at CDC by a [Cohen](#). Mandy Cohen. That figures.

Cohen is younger, so her eyes aren't yet fully dead, just crazy. She is a Fauci nun, worshipping at his black altar. She is famous for her Chai necklace, though they chopped it off in that photo. Remember, Chai stands for 18, aces and eights, their favorite symbol and numerology, along with 33.

What about Tedros?

Amusingly, his Wiki page currently and correctly lists him as a mass murderer. The Wiki censors are moving slowly today.

Tedros Adhanom Ghebreyesus (*Tigrinya*: ቱዎድሮስ አድሐኖም ገብረኢየሱስ, sometimes spelt ቱድሮስ አድሐኖም ገብረኢየሱስ;^{[1][a]} born 3 March 1965)^[2] is an Ethiopian^[2] public health official, mass murderer,^[3] researcher,^[4] diplomat, and the **Director-General** of the **World Health Organization** since 2017.^{[5][6]} Tedros is the first **African** to become WHO Director-General,^[7] receiving an endorsement for the role by the **African Union**.^[8] He played a role in the response to the **Ebola virus epidemic**, the **COVID-19 pandemic**, and the **2022–2023 mpox outbreak**.

Prior to serving as Director-General, he held two high-level positions in the **government of Ethiopia**: **Minister of Health** from 2005 to 2012^[9] and **Minister of Foreign Affairs** from 2012 to 2016.^{[10][11]} Tedros was included in *Time's* **100 Most Influential People** of 2020.^[12]

Early life and education [edit]

Tedros was born in **Asmara**, Ethiopia,^[13] to Adhanom Gebreyesus and Melashu Weldegabir. His family originated from the **Enderta awrajja** of **Tigray**. Tedros recalled that as a child he was very aware of the suffering and death caused by **malaria**.^[14] His younger brother died at the age of three or four years, possibly of a preventable disease like **measles**, which Tedros often discusses as a defining personal experience in regards to the need for global healthcare.^{[7][15]}

His mother is a Weldegabir, which is not an Ethiopian name. It looks like some sort of slur of the German/Yiddish *welt-geber*, world-giver. I think we may assume he is Jewish in many important lines, in which case Adhanom is just Tigray for Adam. Tedros went from one terrorist organization to the other when he joined WHO from TPLF. TPLF is the Tigray People's Liberation Front, a revolutionary organization that overthrew the government of Ethiopia in 1991. It ruled until 2018, when it was overthrown and declared a terrorist organization.

As you will remember, Tedros was preceded by Margaret Chan fu-Chun, and I have taught you that in cases like this, we may assume Chan=Cohen. As you see, Margie is a Cohen twice. Confirming that is not only her first name, which isn't Chinese, but the fact she is a rich girl from Hong Kong. Wiki scrubs her parents. Note the dead eyes. She is bloated and sickly looking, and it would be much worse without the wig. Par for the course for these directors of the World Health Organization. She went to college in Canada and at Harvard Business School. We come full circle with her regarding the subject of this paper, since in 1997 she was the director of health in Hong Kong during the bird flu fake outbreak there. They allegedly killed 1.5 million chickens, no doubt leading to a steep rise in chicken prices. Were her family invested in chickens? She was also involved in the fake SARS outbreak of 2003, which was used to further consolidate power in the health system, no doubt in preparation for the worldwide genocide of 2021. After she left WHO, Chan went to work for Michael Bloomberg and Larry Summers, confirming again her ties to the people of El and to the representatives of hell.

As you see, Tedros also has dead eyes and a very fake smile. Like Cohen, he has been instructed to smile, but he isn't up to it. It isn't as bad as Bill Gates' upside-down turtle smile, but almost.

In searching for that, I noticed the search engines are running interference for Gates, publishing only the best pictures of him and hiding the worst ones. This is a very raw trick, and they do the opposite for people they don't like.

Many of them have been heavily repainted by AI. How do you like that one, where Alexa has sanded down his face for you, faked a smile, and tried to add a sparkle to his eyes? I call that Bill Stepford Gates.

What about Leanna Wen?

Another creepy person with dead eyes. Note the very long face, which is rare for an Asian. She is married to a rich white guy from South Africa, Sebastian Neil Walker, a banker who was living in London. Wikipedia tries to make her family seem poor, telling us her father was a dishwasher and newspaper delivery man, [but *The New York Times* admitted in her wedding announcement in 2012](#) that he was a newspaper manager in Los Angeles. She comes out of the WHO, the Brookings Institute, and the Department of Defense, indicating she is some kind of agent. She was hired by the *Washington Post* in 2019, confirming that once again. In 2018 she became the head of Planned Parenthood, another big red flag, since that is just a front for eugenics—now eugenics via death by drugs. While working as

health commissioner for Baltimore 2014-2018 Wen was in charge of their opioid response. Well, that worked like a charm, didn't it? She really turned things around! You probably only know her as CNN's scolding talking head during Covid, threatening you if you didn't get vaccinated immediately. Funny, since Wikipedia now downplays that. From her page there, you would never know she did that.

Given all that, let us look at what should happen and what could happen. What should happen—supposing we had a functioning republic—is that after the vaccine genocide the Department of Justice would have seized all these companies like Pfizer and Moderna and J&J for massive fraud and murder, liquidated them, and put all assets in the public treasury. All these criminals would then be put on trial for crimes against humanity. But we all know that isn't going to happen, since the government has been bought off.

So what could happen, despite that? Well, YOU could bankrupt these companies directly by boycotting them into oblivion. Don't buy or use any of their products. Take your entire medicine cabinet and trash it. Tell you “doctor” to stuff all his recommendations and bankrupt him as well.

You will say you can't do that because you need your meds. You would die without them. WRONG. You are dying FROM your meds, most likely. Almost all your maladies are caused by lack of exercise, bad food, too much food, and tainted air and water. But you can fix all those things today with no help from doctors, hospitals or pharma. Start by throwing out everything in your fridge and cupboard and starting over. If your water is fluoridated, stop drinking it. Get your water from a tested well or drink from bottles until you can find a longterm solution. Throw out the booze and tobacco as well. Stop eating out, since all that food is now poisoned with GMO oils and HFCS. I find that eating out just one time a week will cause me to immediately gain five pounds, since something in the food signals the body to start storing fat.

When you go to the market, don't buy any prepackaged or frozen foods. Avoid most sections of the store. Buy only organic fruits, nuts and vegetables, organic dairy products (and limit those), and organic or wild meats. Wild caught salmon, venison, bison, or organic grassfed beef. Avoid grains and beans as well, especially soybeans, yellow corn, and peanuts. If you can't live without pasta or tortillas, at least buy organic wheat or blue corn, and read the labels carefully. If it has canola, cottonseed or soybean oil, *do not buy it*, even if it is labeled organic.

After that, clean out your house of all pesticides and herbicides. Get rid of any non-natural rugs, carpets, flooring, and bedding. Wool-stuffed mattresses and pillows are the best since they don't require fire-retarders. Be very careful of any paints you buy, especially interior, since they off-gas for years. Get rid of all other plastics in your house, as far as possible.

There are other rules, but those are the basics and will get you started. If you do all that you will be a different person in a few months. You will likely be thirty pounds lighter, just for a start. You will lose the dark circles under your eyes. Your gums will look better. You will sleep easily and long, even after drinking (organic) coffee. And your mood will improve.
