

Even More Proof the Israel War is Fake

by Miles Mathis

First published June 29, 2024

The news today is that victims of the (fake) Hamas attacks last October are suing the United Nations Relief and Works Agency for \$1 billion. Why? Because it has been admitted by the mainstream press that

The evidence provided by Israel alleging that roughly a dozen UNRWA staffers participated in Hamas's October 7 terror onslaught is "highly credible," US Secretary of State Antony Blinken said Monday, as media outlets published additional details on the implicated employees, including photos from an Israeli dossier.

Of the 12 UNRWA workers accused of participating in the October 7 massacre, seven were reportedly teachers, two were educational consultants and others were humanitarian aid warehouse managers.

That's from the *Times of Israel*. We also find hostages reporting they were held in the homes of these workers. Trump cut off funding of UNRWA, but Biden reinstated it, giving over \$1 billion since he took office.

Can you see through this?

Different outlets are spinning this different ways, but no one is stating the obvious. This reminds us of *Al Jazeera* journalists also being involved not only as embedded reporters, but as the hostage takers themselves. Now we find out the "Hamas terrorists" weren't just reporters with strong US ties, they were these "humanitarian aid" people funded by the US directly. Which means. . . **UNRWA is just another CIA front, and these people are more actors.**

How else can you explain the fact that, upon a closer look, it turns out many or most of these Palestinian "terrorists" aren't local revolutionaries, they are employees of the US government in some way? I have already proved that [in previous papers](#), and we see evidence of it again here.

You will say, "If so, then why are the victims suing these people?" Don't you get it? *They aren't*. It is more vaudeville. The CIA is pretending to sue itself in order to make the event look real. There are no victims, no hostages, no terrorists, no Hamas, and no UNRWA. It is just the usual 3-ring CIA circus, all staged to generate work and profit for the arms manufacturers. With a trillion-dollar-a-year "defense" budget, we can't *not* have constant war. We need some excuse to send those gigantic \$10 billion aircraft carriers somewhere, anywhere, so that they can spend a lot of money and burn a lot of fuel. If they have to pretend to fight fake Houthis in rowboats and rubber rafts, well so be it. If we have to pretend to fight guys on kites and mopeds with \$83 million F35 raptors, well so be it. Without these fake wars they would have to drastically downsize the military and with it your taxes, and you don't want that, do you?
