

Raw Egg Implodes

by Miles Mathis

April 11, 2026

Charles Cornish-Dale, aka the Raw Egg Nationalist, a writer for Infowars, ZeroHedge, the *Spectator* and other outlets, just blew any remaining credibility he had with this article today called “[Ghouls and Grifters: Will This New Evidence Finally Put To Bed the Insane Theories about Charlie Kirk’s Murder?](#)” It is obviously aimed at Candace Owens and her set, whom some faction of Intel has decided to target as a nuisance. Owens' set is not my set, since while they argue Kirk was killed by Israel, [I have proved he wasn't killed at all](#). But Raw Egg has obviously been instructed to try to nip both ideas in the bud by promoting Tyler Robinson's alleged confession. He implies this confession trumps all other evidence, including any ballistics or films, while ignoring the obvious: the CIA can fake a confession in about five minutes. I have already proved this Robinson actor is one of their own and that [the trials are staged](#), but Egg passes that by as if it doesn't exist. These agents love to faux-brawl with each other, but they never as much as mention me. The one thing forbidden.

[An anonymous author at Zerohedge](#) is coincidentally pushing the same thing today:

Robinson left a note under a keyboard for his roommate/romantic partner to discover, said Utah County Attorney Jeffrey Gray. Twiggs (aka Luna) took a photo of the note, which he gave to investigators. The original had been partially burned according to reports, but was recovered and pieced together by forensics.

Oh, well that sounds kosher, right? A handwritten note under a keyboard. GenZ loves handwritten notes—was it in fancy cursive, from a quill pen and an ink dipper? Must be true.

Based only on that fake confession, obviously penned from some cubicle in Langley, Egg says,

Tyler Robinson killed Charlie Kirk.

Hopefully this will now be enough to silence the grifters, retards, ghouls and shameless profiteers who have done everything they can to muddy the waters since Charlie Kirk was murdered, harassing and defaming his widow and former colleagues, and spaffing away in the

process a tidal wave of sympathy and goodwill that could have been used to do something, finally, about the radical left and its campaign of violence against its political opponents.

The tone there doesn't match Egg's usual tone, and it reminds me of [Matt Taibbi crashing in a similar fashion when being ordered to take on 911 Truth years ago](#).^{*} That was Taibbi's low point and this may possibly be Egg's. Both men seem at these times to be swimming far outside their pools, and in both cases I see signs of duress. Egg would probably prefer to maintain his original assignment of flanking people like Matt Walsh and Jordan Peterson, doing some good work defending men and boys, as well as talking about natural food, but it was not to be. Being one of the last people in the mainstream that can still write, Egg had to be tapped by the big boys to do their dirty work, as here, but he is clearly not comfortable doing it, like Taibbi letting his anger show. Intel may even be inserting their own sentences here, [as I have shown they will do](#), since Egg says some of the stupidest things he ever has, like this:

Not that I'm saying Charlie Kirk's murder was a victory. It wasn't. It was a dreadful, dreadful defeat; the brutal snuffing out of a once-in-a-generation talent and a man who, if he didn't become president himself one day, would certainly have played a key role in installing president after president for decades to come. He had already done that in 2024: It's hard to believe Trump would have won without Turning Point USA and its big, goofy, untiring and utterly inspirational young leader.

You have to laugh. Charlie may have written that himself.

You also have to wonder why Infowars would print this article, since it doesn't fit their normal style or tack. It will be sure to further damage their audience. As another example, he says:

I believe, in years to come—assuming, of course, that we win—that the aftermath of Charlie Kirk's murder will be studied as a textbook example of the right's lamentable tendency to snatch defeat from the jaws of victory. It's baked in, a Pavlovian response, and it's just so utterly self-destructive. Something needs to change, right now. The left would never behave this way if one of their own had been killed like Charlie Kirk.

That's very weird, isn't it? Doesn't sound like Egg to me, unless he is on vastly different meds this week. The readers at Infowars definitely won't appreciate the novelty of that. Which reminds us that this is just as much a further loss of credibility for Infowars and anyone else who prints this as it is for Egg. It once again proves Infowars is being used a conduit by CIA and MI6—as if we didn't already know that.

You should have already known it, both about Infowars and Egg, and Charles Cornish-Dale's name should have given that away a long time ago. Which is why he hid it for so long, writing under a pseudonym. He wasn't outed until 2024, when Hope not Hate revealed his real name. It was a major blowing of cover, since although Egg has been posing as a conservative everyman, the ultimate friend of the commoner white male, pal of the American trucker and benchpresser and so on, he is actually British peerage, a PhD out of Oxford. I had assumed he was older, but it appears from dates in his bio he is about 33.

The Cornishes are closely related to the [Rhodes, Warres, Eyres, and Ritchies](#), so I assume Charles is a cousin of Guy Ritchie. Also closely related to Huths and Meinertzhagens, which opens a whole other can of worms. This links him to intelligence officer [Col. Richard Meinertzhagen](#) and the merchant-

banking dynasty Frederich Huth &Co. You can read more about Richard at that link to Wiki if you wish. Even better, the Huths link us to the [Bourbons](#) through Maneula Mayfren, daughter of the Infanta of Spain. One of Charles' recent ancestors, Francis Warre Cornish wrote a biography of Oliver Cromwell, [which we now know was fiction](#), as well as *A History of the English Church in the 19th Century*. That pretty much proves Charles is of the same Cornishes, since his PhD paper was *Migrations of the Holy: The Devotional Culture of Wimborne Minster, c.1400-1640*, which is about the religious history of a [Dorset](#) parish.

I can't really square that PhD thesis with his work of just a couple of years later, though I guess anyone can like eggs, and it did take him several years to go from promoting meat and whole foods to defending Charlie Kirk. I haven't read his books or his magazine and have no desire to, I only know him from a few articles in the alternative press, which seemed pretty sensible. His Wiki page says he is a white nationalist, but I have never seen any evidence of that. But now I see he is [writing five articles a day for places like Infowars](#)—or allowing his name to be on them at any rate—often selling mainstream malarky, so something is rotten in Denmark. Like many others we have seen, he appears to be coming into his full inheritance and full assignment at 33, so I am now on alert.

Charles also links us to lots money through the Dales, who are also baronets related to the Douglasses, Murrays and Grafs von Benckindorff. This links him to the Princes von Croy, the Princes of Salm-Salm and Jewish/Russian nobility like the Shuvalovs.

*In returning to this, I noted that Taibbi's debate with David Ray Griffin on 911 at [Alternet has been 404ed](#). Hmm. Slowly rewriting and trashing history, this time obviously at the request of Taibbi, who lost that one in a series of knockouts. Tells you a lot about Alternet, in case you didn't already know. [You can still find it here](#). I beg you to notice how this “debate” is framed, no doubt at the request of Taibbi and spook-front Alternet: Taibbi gets to ask Griffin a series of trivial and diversionary questions, with Griffin constantly on the defensive, while Taibbi is insulated from any hard questions (or just ignores them). I also take the time to remind you that this brouhaha is what brought Alexander Cockburn and all those agents down, along with Chomsky and many others. When was the last time anyone heard of the Cockburns? By the time Alex died in 2012 he was already a non-entity, precisely due to his position on 911. 14 years later, I had forgotten he ever existed. The legacy of all these people. It is amazing Taibbi survived this, and he did so only by burying it and switching sides.
