[Trump claimed today](#) he saved those eight Iranian women from execution in Iran. You have to laugh. Do those women look even remotely Iranian? Do they look even remotely real? Amazing that 7 of them were shot in the same studio at the same time with the same edge backlighting, right? With the same black background. Are those supposed to be mugshots or jail shots? They have amazing photography studios on death row in Iran, don't they? I didn't realize Iranian women wore so much lipstick under their hajibs, did you? What is the point of that? They seem to use a lot of hair color, too.

Those are obviously CGI, so hard to believe they thought anyone would buy this. With a bit of work, I could even tell you how AI pieced those faces together, scraping Hollywood actresses and maybe famous singers. Like Jim Carrey did in the *Truman Show*, trying to rebuild his woman's face from *Vogue* magazine bits. I recognize some pieces immediately and maybe you do, too. The short-haired woman has Kate Winslet's eyes, for instance. The dark girl next to her may have Ashley Judd's eyes. The next one may have Bridget Fonda's mouth. The last one may have Beyonce's hair. She definitely has Drew Barrymore's mouth.
