

Another Fake Mennonite Murder

by Miles Mathis

June 4, 2026

This concerns the alleged murder and rape of Mennonite woman Sasha Krause of Farmington, NM, by an airman from Luke AFB, Phoenix, Mark Gooch, on January 18, 2020. Aces and eights, of course. Wiki doesn't even have a page for it, and although Gooch is now supposed to be incarcerated at a prison in Eyman, being listed there, Wiki's page on Eyman prison leaves him off their list of famous murderers. Moreover, a search on Gooch at Radaris tells us the big computer doesn't know he is in Eyman, listing him instead in Antigo, WI, as his current address.

He was allegedly given a life sentence in 2022, so they have had four years to find him in Eyman.

You will say this doesn't blackwash Mennonites, since the victim is a Mennonite, not the murderer, but as it turns out Gooch was also a former Mennonite, supposedly angry at them for his upbringing. So it sells you the idea Mennonites aren't as pacifist as they claim.

And just guess who these Gooches are closely related to? Not only the Lambrechts, Reiters, Scotts, and Penroses but the **Stewarts**. One of Gooch's grandfathers is James Patrick Stewart in Menomonie, who died at age 75. The rest of Gooch's family was from that area.

Menomonie is itself a red flag, since lots of fakes come out of there and always have. It is famous for them. See the Smiley Face Bomber, [Luke Helder](#):

Ultimately, Helder planted **18** bombs and covered 3,200 miles (5,100 km).[3]

Although he allegedly injured at least six people, he was judged incompetent to stand trial. That's convenient.

So why run this story?

Within the year prior to his arrest, Helder had become passionate about [astral projection](#) techniques and came to believe that death of the flesh and body is not

the end of existence, as evidenced by the manifesto he sent to [The Badger Herald](#) of the University of Wisconsin–Madison at the beginning of the bombing spree.[3]

Hmmm, every Christian, Muslim, Jew, and most other religious people could say the same, and it has nothing to do with astral projection. But here he is being tarred as crazy for that. Helder was also blackwashed for being part of a grunge band and liking Kurt Cobain. Like only ten million other kids.

Finding Helder incompetent and held at the Federal Medical Center in Rochester is interesting, since a Linda Helder just happens to be a Senior Business Analyst at the Mayo Clinic there, according to a quick search at LinkedIn. There are also several Helders at MerrillLynch in Rochester. A people search on Lucas Helder finds he is related to Wrobleski, Deetz, Fiedler, Toussaint, and Koehn. Well, what do you know, all Jewish names, including the biggest. Who would have guessed!

Deetz is a variation of Dietz, from von Dietz or Graf zu Dietz, Jewish/German peers. They are closely related to the Sachsens (Saxes), Jagiellons, and Hessens, rulers of Germany and England for centuries. The current King of England is a Saxe.

There Helder is in highschool. Doesn't really look like a bad seed or schizo, does he? He's number 15, so probably the quarterback. Radaris lists him, but not linked to any Helders and not housed in that Medical Center in Rochester. Its current address for him is in Menomonie. His mother is apparently Pamela Helder, 75, of Pine Island, and all her emails are dirdjew.something. Come to your own conclusions.

But let's return to the first fake, the one in Farmington. The victim is given as Sasha Krause, 27 in 2020, but we aren't given any more information on her. She should be 32/33 now, if still alive. Problem is, the big computers have never heard of her. There is no such person from Farmington and never was. The only one in that age range is in Minot, ND, married name now Yabusaki. But that fits my theory perfectly, since Minot is the location of the huge Minot AFB, and the fake murderer Gooch was from Luke AFB in Phoenix. So this is just another conjob from Air Force. Plus, Sasha never sounded like a Mennonite name to start with. And Gooch was allegedly convicted on cell tower pings from Sasha's cellphone . . . but plain Mennonites don't carry cellphones. We are told Sasha was plain, wearing the bonnet and everything, but that she was carrying a cell at all times. Doesn't scan.

The authorities noted that Sasha's car was still at the church, and her purse was in her room. The only thing she had taken with her was her cellphone.

So a plain Mennonite leaves her purse but takes her cellphone? They tell us the only two phones that pinged that tower in those hours were those of Krause and Gooch. Really? Farmington is small, but it isn't that small. There are over 50,000 people in that area, so there is no way you could tag a murderer that way.

Here's the biggest problem with the story: we are told Gooch drove seven hours to kill a Mennonite girl, but there are many Mennonite communities in Arizona much closer to Luke AFB than that. There are twelve Mennonite congregations in Phoenix alone, including Sunnyslope. So why drive all the way to New Mexico?

There, Sasha worked at a publishing house and taught Sunday school. She had been living on the compound for about 18 months when tragedy struck her. On January 18, 2020, Sasha swung by the church at around 7 pm to pick up some books for an upcoming Sunday school class.

That also makes no sense, since Mennonites don't normally move around a lot. We are told she was from Texas, and close to her family, so why would she move to this desolate area of New Mexico where she had no relatives? And why not tell us where in Texas, though it wouldn't matter because the big computers have no listing for her in Texas, either.

[Next day: after prodding from a reader, telling me I might be wrong, I tried again, and did find her

page at Findagrave. But it still looks manufactured. No picture of her gravestone, which is the whole point of the site. Mennonites would not cremate. I got some relatives and locations there, which I ran through the people searches again, but still no luck on this Sasha Krause, 27 or 33, of Temple, TX, or Farmington, NM. I did find her mother, Laura Lurette Krause, of Temple and Itasca, but Sasha is not on her list of 13 relatives, although her other siblings are listed. She should have been captured by the big computers by that phone she allegedly had, if by nothing else. And I did find yet another red flag, since Laura is related to a Christina Marks. Marks=Marx. In fact that may be her maiden name. Christina looks like her sister, and they are from Great Barrington, Massachusetts. Sasha is also not on her father Robert's page, though that includes 12 relatives. The mystery only deepens.]

So like the other projects blackwashing the Mennonites and Amish that I have already blown the cover of, this one looks manufactured. This time by Air Force. Those boys sitting around base literally have nothing better to do than create these stories to scare you.
