

Adrienne Shelly Faked her Death

by Miles Mathis

First published September 1, 2022

As usual, this is just my opinion, arrived at by the easy online research I give you below

Before we get to Shelly, I want to hit a couple of things in the news this week. To start with, we find that mainstream scientists are now admitting their fields are rife with corruption and fraud. See [this recent article](#) from the *BMJ (British Medical Journal)*, one of the top medical journals in the world, going back to 1840. That article, written by a former editor of the *BMJ* and co-founder of the Committee on Medical Ethics, is entitled “Time to assume the health research is fraudulent until proven otherwise?” And his answer is YES. He mentions an audit done on trials in the journal *Anaesthesia*, which found 44% had bad data and 26% were zombie (completely fake). He shows the problem is not limited, but systemic, encouraged by skewed funding and lack of regulation. Also, I may add, bribes, slushfunds, and a broad lack of integrity in scientific fields, *especially* at the top. I have been giving you evidence of it for almost twenty years now my fields, and it is widely admitted, though usually not this publicly or this near the top. In physics we have seen it most prominently and conspicuously in the reporting of sunspot numbers, which Air Force took over from NASA and NOAA a couple of years. They are now suppressing them by over 50%. They also moved solar minimum forward by using a 13-month smooth and other finesses.

And in other thoughts I had this week: you have all done those captchas, to prove you are human. So tell me this: If computers are so smart, why can they not tell the difference between a bus and a train, or tell the difference between horse and a dog? And computers can't read fuzzy text or text with little lines drawn through it? Wow, really not going to take over the world like that, are they?

After my recent paper on Hollywood, a reader wrote in and told me he liked Adrienne Shelly, that she seemed genuine and so her murder must have been real. She was allegedly murdered by a construction worker in her own bathroom in 2006. I said, “what makes you think the murder was real?” Basically he said it was because he liked her. But then he got my hint and researched it himself. He quickly discovered that [her director/producer husband ended up confronting her murderer in jail](#), with cameras

rolling. That isn't allowed, proving it was fake. My reader was so distressed by this, he called the prison in Coxsackie, and they confirmed that “no cameras or electronic devices were allowed”.

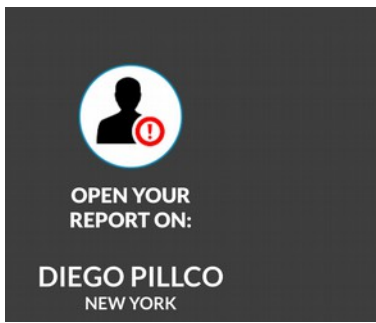

That link is to the *New York Post* from last November. That is when the HBO documentary came out. So that is your next clue it was fake: it was pushed by CIA-front HBO, and of course it sells the Men-are-Pigs project. We are also reminded she was killed November 1, 2006. Not only aces and eights, 11/1/2006, with $2+6=8$, but also All Saints Day, the day after Halloween. Also that her real name was Adrienne Levine. Could only be worse as a matter of fake events if she was Adrienne Cohen. So let's see what Instantcheckmate has to tell us about Adrienne Shelly/Levine of New York. Absolutely nothing. She is there, but her relatives list is the dreaded *i*, as if the big computer knows nothing of her. This means she has been scrubbed. Not even a link to her husband, Andy Ostroy. Ostroy is also completely scrubbed, with the same *i*. But we can link him to Andrea and Paul Ostroy, since Andrea is from Weehawken like Andy. But it gets stranger. If we look closely, we see that Andrea is aka Andrew.

NAME	AGE	LOCATION	POSSIBLE RELATIVES	y
Andrea L. Ostroy aka: Andrea L. Ostroy, Andrea L. Disch, A Ostroy, Andrew Ostroy	49	Lafayette, CO Boulder, CO Reston, VA Marion, AL Garland, TX Great Falls, VA Greenville, NC Morgantown, WV Weehawken, NJ	Allison Disch Christopher Disch Jason Disch Michelle Disch Paul Ostroy	
Andrew B. Ostroy		Weehawken, NJ	<i>i</i>	

Also notice that “she” has also lived in Reston and Great Falls, VA. Langley, CIA. Andrew/Andrea is also Jewish, since they link us to Zipora, Yehoshua, and Yehuda Ostroy. So is Andrew a CIA tranny in his spare time, or what is going on here? Let's click on the Christopher Disch. He is Christopher Judd Disch of Ft. Collins, and he links us to the Clintons.

Returning to Adrienne, we find an Adrienne Levine, 56, the age she would be today, with Flushing also on her list. Adrienne Shelly also has Flushing on her list. So as usual, we seem to be finding the computer thinks she is both alive and dead. They have multiple listings for the same person.

Next let's look at the alleged killer Diego Pillco. The name looks fake already, doesn't it? There are only 105 people in the US with that surname, according to forebears.io. The story at the *New York Post* claims Pillco is in a jail in “upstate New York”. Why not give the name of the jail? Because he isn't there, of course. Instantcheckmate gives one result for Diego Pillco of New York, and it is Diego Guambana, 35, of Ridgewood, NY. Right age, and related to Pillcos. Is there a penitentiary for lifers in Ridgewood? It doesn't matter, since Ridgewood is in Queens, not “upstate” New York.

click the headers to sort the results. Once you find a match, click "Open Report" to continue to the report.

NAME	AGE	LOCATION	POSSIBLE RELATIVES
Diego A. Guambana	35	Newport News, VA Ridgewood, NY El Paso, TX Stockton, CA Felton, PA	Fausto Guambana Mariuki Guambana Nelson Guambana Carlos Guambana-pillco Claudia Guambana-pillco Jessica Guambana-pillco Maria Pillco

A prisoner search tells us he is in Coxsackie Prison, south of Albany. So why doesn't the big computer know that? As I keep telling you, prison records should be some of the easiest for these computers to gather, since they are government and public. But the big people search computers have no listing for him there. As you see, they *do* have listings for him in Newport News, VA. Strange, since that is high-dollar real estate, being a big military and aerospace hangout. It is of course the site of Joint Base Langley-Eustis. Same for Stockton, CA, known for golf courses and Echo Base. Same for El Paso, the site of Ft. Bliss, the largest army base in the US. So that was informative, wasn't it?

Let's also run some of his relatives. Fausto Guambana appears to be an older brother, being age 39. He has an AP address, meaning he is US military. Also Colorado Springs and Ft. Carson, same thing.

Claudia Guambana-Pillco is a healthcare specialist in the US Army, living in Seattle. She attended University of Maryland and has a certificate of accounting. She also worked in Nuremberg, Germany. This is from her LinkedIn page. So this family is really not sounding like a family of poor illegal aliens.

Carlos Guambana-Pillco also has a LinkedIn page, and there we learn he is also US Army, 12-year veteran. He has an MS in clinical psychology and is working on his PhD at Capella University. He was also in Germany for eight years.

Deyci Guambana-Pillco is an accountant in Stamford, CT. Through [Victor Guambana](#) we link to the [Milners](#), a big spook family we have seen many times, linking us straight to . . . Hitler. No, seriously. See the [Milner Group](#), led by Alfred, 1st Viscount Milner. Not a name you would think this poor immigrant Pillco would be linked to with so little research. Milner was War Secretary during WWI and later became Secretary of State for the Colonies. That is, for us, the US. He was the trustee for Cecil Rhodes' estate.

Also of interest is that Ostroy sued the construction company Pillco was allegedly working for, for accessory to murder. Not sure how a construction company could be liable for a CIA project, but there it is. The judge shot it down. Ostroy then started the Adrienne Shelly Foundation, to give money to women to make more Men-are-Pigs movies. As if we didn't have enough of those to start with. One of the first recipients was Cynthia Wade, for her LGBT film *Freehold*, about same-sex partner pension benefits. Chloe Zhao also received money from the Foundation, and she is now heavily promoted by Intelligence, having won Best Director in 2021 for *Nomadland*. That film is beautifully shot and produced, but it is CIA propaganda nonetheless. It has a running time of 108 minutes, signaling that, but I don't need that signal. I can see from the preview it is prepping for you for the near future of homelessness they have in store for you, trying to make it seem like a romantic adventure. I found the whole thing really depressing, like a very long adult diapers ad. I am not the only one who felt this.

[See this youtube video](#), which expresses it fairly well.
