

The Christa Pike Story is FakeFAKEFAKE

by Miles Mathis

September 30, 2026

Yep, another one. This is the one in the news now, about the lady supposedly on death row in Tennessee for killing a girl in 1995 in Knoxville when she was 18. Here is how I know it is fake.

I start by looking her up in that jail listed at Wikipedia on her page. Debra Johnson Rehabilitation Center in Nashville. Wiki provides a link to the jail's own website, where you can do an inmate search. Turns out she isn't there, she is in the Riverbend Maximum Security Prison, also in Nashville.

TDOC ID	Photo	Name	Birth Date	Status	Assigned Location
00261368		PIKE, CHRISTA GAIL	03/10/1976	INCARCERATED	RIVERBEND MAXIMUM SECURITY INSTITUTION

The problem? [Riverbend is only for men on death row, not women.](#) They do not house violent men and women together, for obvious reasons. The second problem is that we are told she has been in solitary confinement for 30 years. Impossible, since that would be considered cruel and unusual

punishment according to US and international law. But since other inmates there have never seen her, they need this solitary-confinement dodge to answer that.

This is also a problem:

On August 24, 2001, Pike was accused of attacking and attempting to strangle fellow inmate Patricia Jones with a shoestring.

Again impossible. That is why they don't have shoestrings in maximum security. Convicted murderers are not given shoes with laces, for that very reason. Also because they could attempt to kill themselves. Likewise for this cocknbul story:

In March 2012, it was revealed Pike had made escape plans involving corrections officer Justin Heflin as well as Donald Kohut of New Jersey.[35] Kohut, a personal trainer in his 30s, had entered into a letter-writing correspondence with Pike around the beginning of 2011. By July of that year, Kohut was making the nearly 1,700 mi (2,700 km) round trip from [Flemington, New Jersey](#), to Nashville, Tennessee, to visit Pike in person once or twice a month. Eventually, Kohut communicated an escape plan to Pike and enlisted the help of corrections officer Heflin, who agreed to participate in return for cash and gifts.[36]

All inmate mail is read, incoming and outgoing, just to prevent such a thing. Kohut was allegedly sentenced to seven years for that, but Heflin skated, serving no prison time for trying to spring their top inmate, proving again it was faked.

We can also look up Kohut, who is easy to find on a People Search since he is 48 from Flemington, NJ. According to Findagrave, his uncle Robert Kohut was Air Force. Donald is supposed to be serving his sentence in Tennessee, but his listing has no locations in Tennessee. The big computers at Instantcheckmate and FastPeopleSearch think he is living in South River, NJ, now. In fact they have dated entries placing him somewhere else when he was supposed to be incarcerated in TN.

Full Name:

Donald J Kohut Jr

He was allegedly sentenced to seven years at Doe Valley, TN, in 2012, but as you see he had a new landline in New Jersey in 2013.

Another way we know it was faked is that until 2020, no one ever ordered the execution. So she allegedly sat there for 24 years with no execution order. For most of that time no serious appeals were on the books, so none of this makes any sense. None of her appeals even addressed the execution, so the execution was not paused to answer them. The appeals addressed her age, specifics of the trial, or her treatment in prison.

Next, we have that prison shot from 2016. She is 39 there, and I say that isn't someone who has been in solitary for 21 years. She looks like she just came from the salon, with a new perm, lipstick, full eye makeup and sculpted eyebrows. That looks like a mugshot from the local country club. Also notice the smirk on her face. The left side of her brain can hardly stop laughing.

So let's look her up at FastPeopleSearch, in Knoxville or Nashville. They have never heard of her. There is no Christa Gail Pike in all of Tennessee. Instantcheckmate has also never heard of her, though the computer there thinks she is Christina Foster, 43, for some reason. So this lady is a ghost. It makes me think CIA borrowed her name from Crystal Gayle, also from Nashville, of course.

What about the victim, Colleen Slemmer? Instantcheckmate has her, but all relatives and locations are suspiciously scrubbed. FastPeopleSearch has no listing, but does take us to a Katherine Slemmer, aka Houle, 60, who lived in Knoxville in 1995. She links us to Willetts, which may be a clue because Sharon Tate's mother was Doris Willett. We also find her related to Reiss, Phillips, Rudman, Sosa, Zwicker, Knowles, and Heintz, indicating the usual thing.

Which of course reminds us that Pike is a similarly spooky name, possibly linking us to General Albert Pike, Master Mason. Does he have any links to Tennessee? Yep, he lived there after the Civil War, practicing law.

We know Colleen's mother is May Martinez, so who are Christa's parents? Wikipedia doesn't say. AI tells me they are Emil Glenn Pike and Carissa Hansen, giving Wiki as a link for that. But that info isn't at Wiki, so it must have been scrubbed recently. I guess they saw me coming. The second link AI gives is allthatsinteresting.com, but the parents aren't there, either. So this is being hidden, though not

very well. FastPeopleSearch hasn't heard of them, either, though it does have a listing for Carissa Hansen of TN, of the right age. Except that she is related to no Pikes. She is aka Fotos.

Instantcheckmate lists Emil Glenn, 76, but he is from WI and WV, not TN. Related only to Max Pike. We also find Carissa Hansen there, related to Christa Pike but not Emil. She is listed as Carissa Fotos, 74, and her husband and son are both named Chris Fotos. Chris, Jr. and Chris III. Why is that interesting? Because her husband Chris, Jr., and his father Chris, Sr., are from Silver Spring, Herndon, and Falls Church. Possibly indicating CIA. Even more interesting? She died in 2025 and has a Findagrave page, where we find her maiden name was Fotos, so the two Chrises are her father and brother, not her husband. Same result as far as we are concerned. She was cremated, which is convenient. Her mother was Zola Fotos, but Chris is scrubbed from Carissa's page. Not very well, because he is on Zola's page.

Emil Glenn Pike died in 2024 and [has an obituary page](#). Son of Emil Leonard Pike and Delpha Clark Pike. [Army Veteran](#). No jobs listed. Findagrave spells his mother Delfa. But here's a question, same one I had with the Lindberghs: Why would Emil Leonard Pike name his son Emil but give him a different middle name? This tells me Emil Glenn is probably not his real name. Maybe it is Albert. Also curious is that his obituary originally said he was survived by his dear friend Scott Harper, indicating that was his partner late in life. Which may or may not be a clue here. Findagrave takes these Pikes back several generations, but stops just before we can link him to Albert Pike.

OK, you really aren't going to believe this, but here it is. I have said before they know I am writing this as I write it. Well, look above, where I reported Wiki listed Christa Pike as being incarcerated at Debra Johnson Rehabilitation Center. A few hours later, the Wiki page has been updated to Riverbend Maximum Security.

And the theater crescendoes, as today, while I was writing, they allegedly tried to kill her by injection, but failed, TWICE.

At 8:26 p.m. local time, witnesses said “executioners had injected both syringes of lethal injection chemicals” and Christa Pike was “still alive and snoring,” her lawyers said in a federal court filing.

They said Pike “has not lost consciousness and still has a heartbeat” and that curtains to the death chamber “have gone down twice.”

So this is turning into some kind of really bad Hollywood movie and media circus, staged to draw your attention in any way possible. If you didn't know, [they were in some sort of rush to kill her before midnight tonight](#), since the paperwork expired at the end of the month or something. Sounds believable, right? Is this how it is done? Rushing a state murder to meet a deadline? We are supposed to believe a Circuit Court stayed the execution in the last hour, but that the US Supreme Court got involved somehow at the very last minute, vacating the stay and allowing the execution to go ahead. Impossible, since courts do not work that fast. Are we supposed to believe they just had the Supreme Court on hold all day? So as usual none of this makes any sense from a legal standpoint, and my

assumption, as it always is now, is that CIA is writing this script and so none of the courts can do anything about it, including the Supreme Court. CIA outranks the Supreme Court by a mile, so there is no way the Supremes are going to blow the cover of this story. They are just fellow agents anyway, and [the big computers have never heard of Ketanji Brown Jackson, either](#). All her school photos are fake.

None of the story makes any sense from the first word, since there is no possible way a jury would give an 18-year-old girl the death penalty in Tennessee in 1995. Especially one who had been previously raped and abused. And if they had, someone would have knocked it down in the meantime, either a President, a governor, or a judge. So this is clearly part of the current mindstir, timed to go with the Lindsay Clancy mindrape and all the other fickery going on right now.
